Accellos One Ship

Integrated Multi-Carrier Shipping System

AUTOMATE FROM ORDER ENTRY THROUGH DELIVERY

Achieving that goal is becoming more challenging by the day: rules and regulations from the major carriers (FedEx, UPS, USPS) are in a constant state of flux, LTL rates are all over the map and customer expectations continue to expand in today's fast-paced global business climate. You can use the carriers' systems, but that puts your personnel squarely in charge of determining the lowest cost means of delivery.

Accellos One Ship is a multi-carrier shipping system designed flexibly to fit anywhere in your organization:

- Integrated into an automated, high volume warehouse environment
- Standalone within your mailroom
- Running from your user's desktops – either standalone or integrated with your ERP

The system was built using the latest in Microsoft .NET and Silverlight technology, designed for scalability, and tuned for maximum performance in high volume applications. Accellos One Ship allows you to maximize cost savings by leveraging carrier selection with our multi-carrier rating engine with a single shipping system to maintain for your enterprise.

Reduce your shipping costs, improve your shipment reliability, track every shipment and maintain valuable key performance metrics. With Accellos One Ship, you can improve your customer service while driving out operational costs.

SUPPORTED CARRIERS:

- UPS
- FedEx
- USPS
- DHL
- Canada Post
- Canpar
- Purolator
- Spee-Dee
- LoneStar Overnight
- Evans Transportation
- Eastern Connection
- On-Trac
- Newgistics
- LTL

The ARC Advisory Group states: *“The primary objective for implementing a transportation management system is to meet customer service level requirements at the lowest cost”.*

POWERFUL CARRIER RATING SERVER

At the heart of any multi-carrier shipping system is the rating server. Accellos One Ship is no exception. Our server is designed for high volume, reliable shipping and comprehensive carrier compliance – with the flexibility to scale from a single workstation to an enterprise level solution with multiple servers, load balancing and high availability to meet even the most advanced requirements.

EXTENSIVE CARRIER COMPLIANCE

Accellos One Ship is certified by all the major parcel carriers. We’ve passed the USPS MAC certification and we’re a registered Confirmation Services and Express Mail Manifesting Vendor application.

Accellos One Ship provides a UPS Ready solution for worldwide parcel shipping as well as UPS Freight and UPS Mail Innovations extensions.

And, we don’t stop there! We’re a FedEx Compatible Solution, supporting worldwide shipping of FedEx services, including FedEx Freight and FedEx SmartPost.

Plus DHL, Canadian carriers, LTL and Regional carriers like Spee-Dee and On-Trac!

INTUITIVE USER EXPERIENCE

It’s not enough to be robust – you have to be easy to use. Our innovative “ShipSpace” user interface is delivered in a browser, but acts like a familiar Microsoft Office solution that you use every day. From a simple means to rate shop and ship to end of day close and paperwork creation, ShipSpace makes it easy to train your team to take advantage of your Accellos One Ship solution.

And, wait until your team has a chance to use our “visual search” based Shipping History system!

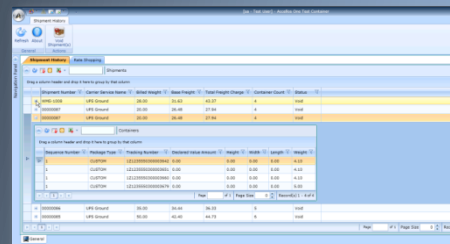

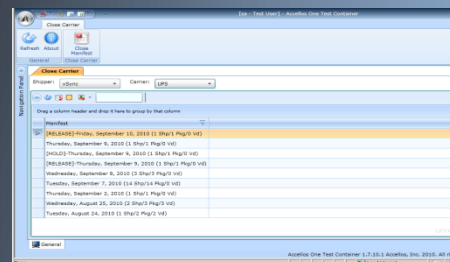

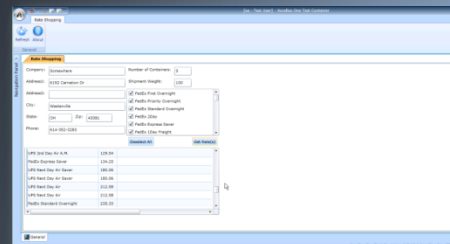

PRODUCTIVE OPTIONAL MODULES

Accellos One Ship has a variety of extremely useful optional modules to streamline your shipping operations, including AES Direct filing, HazMat paperwork for the major carriers, Scheduling and Tracking, Flexible Label and Document creation, and Universal Monitoring.

And, one of the coolest integrated Dashboard and Reporting systems available on the market today!
